

NLP is the branch of AI that helps computers understand and work with human language.

NLP (Natural Language Processing) is a branch of Artificial Intelligence (AI) that enables computers to understand, process, analyze, and generate human language.

In simple words:

NLP is the field that teaches computers how to work with human language such as English, Bengali, Hindi, Arabic, etc.

Examples of NLP in Daily Life

ChatGPT

You type:

What is Machine Learning?

ChatGPT understands your question and generates a response.

Google Translate

Input:

আমি বাংলাদেশে থাকি।

Output:

I live in Bangladesh.

Gmail Spam Detection

Email:

Congratulations! You've won \$1,000,000.

NLP helps classify it as spam.

Sentiment Analysis

Review:

This phone is amazing.

Output:

Positive

Voice Assistants

- Siri
- Alexa
- Google Assistant

Convert speech → text → understand meaning → generate response.
